

# **NEW**

## **Clear PET Thermoform Recycling at the GLRA's Recycling Drop-off Center at 1610 Russell Road**

Clear PET Thermoform Packaging Items are now being accepted in a separate container located at the Greater Lebanon Refuse Authority Recycling Drop-Off Center.

### **What are Clear PET Thermoforms?**

Any clear or translucent packaging with a #1 PET plastic resin code.

This includes, but is not limited to, clamshells, cups, trays, tubs, lids and clear plastic vacuum molded consumer packaging. Examples are shown below.

### **How do I prepare these recyclable items for recycling?**

Just like your other recyclable containers – complete washing is not necessary, but remove as much food, liquids and non-recyclable materials as possible.

### **Can I recycle black or colored PET Thermoforms?**

No, not at this time. Black or colored PET thermoforms mixed in with the clear material will result in a contaminated load that must be landfilled. If in doubt, please place it in your trash for disposal.

**Note: Colored portion  
of thermoform package  
is not recyclable**
